PROFESSIONAL SUMMARY

AI Developer and 2nd-year B.Tech AIML student at GRIET who builds real-world AI and cybersecurity systems, translating complex algorithms into market-ready applications. A strong communicator and problem-solver, I collaborate effectively in cross-functional environments and leadership roles within the Computer Society of India. Hands-on with **LLM APIs, LangGraph, ChromaDB, prompt engineering, and AI automation workflows**, alongside full-stack delivery using Google Antigravity IDE, Stitch, and Opal. **I have helped 25+ businesses launch their first website.**

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, Java, SQL, HTML, CSS, DSA
AI / GenAI: Generative AI, Prompt Engineering, LLM APIs, RAG, LangGraph, ChromaDB, MCP, Hugging Face, NumPy
Cloud & DevOps: AWS, Docker, Kubernetes, Git/GitHub, Netlify, Render, n8n
AI Dev Tools: Google Antigravity IDE, Google Opal, Stitch, Figma

EXPERIENCE

Freelance Full-Stack Developer | Independent **Hyderabad, India | Present**

- Launched first websites for **25+ businesses** end-to-end (discovery, pricing, UI/UX design, React and Tailwind CSS build, Netlify deployment), using Google Antigravity IDE and prompt-engineering workflows to ship faster and improve client digital engagement.
- Delivered a live, mobile-first site for **Vitra Catering Services** to boost online visibility, and architected a robust platform for **Tease Mokila Salon** to streamline their operations.
- Demonstrated strong communication and negotiation skills by building an outreach and lead-generation process targeting Hyderabad small businesses, with pricing tailored to the Indian SMB market.

Technical & Corporate Relations | Computer Society of India (CSI), GRIET **Present**

- Contribute to society-wide technical initiatives as part of the Technical and Corporate Relations team, leveraging teamwork and leadership to bridge academia and industry.
- Designed **OrgVault** (React, Node.js, MongoDB), a role-based knowledge and resource platform, and successfully pitched it to CSI GRIET leadership to improve internal operations.

PROJECTS

VeriTrust AI: Enterprise Hallucination Guardrail | Live Demo | GitHub **2026**

React, TypeScript, FastAPI, LangGraph, ChromaDB, Gemini API, Tailwind CSS

- Built a real-time Maker-Judge guardrail that intercepts customer-support LLM answers and returns **Approved, Corrected, or Blocked** verdicts before they reach the customer.
- Engineered the Judge to split each draft into atomic claims and verify them against ChromaDB policy chunks using semantic entailment and keyword-overlap scoring.
- Added a code-level arithmetic engine that checks day counts, prices, and percentages deterministically (about 0.2 ms per check, zero LLM cost).
- Developed a human-review queue to refine model accuracy and index supervisor decisions into rules, featuring a drift dashboard, multi-tenant workspaces, and a drop-in API endpoint.

AuraGuard: Emotion-Aware Encryption Engine | GitHub **Mar 2026**

Python, Flask, NLP, AES-256

- Built an NLP system that detects emotional risk in text in real-time and adapts **AES-256** encryption behavior accordingly, achieving a sub-second classify-and-encrypt cycle.

AICROP-DETECTOR: AI Smart Farming Platform | Live Demo | GitHub **2026**

React, Vite, Tailwind CSS, Three.js, Zustand

- Developed an AI Plant Doctor for disease diagnosis, optimizing crop recommendations and season planning through integrated cost calculators.
- Designed an interactive 3D, animated interface (React Three Fiber, Framer Motion, GSAP); deployed to GitHub Pages with GitHub Actions.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology (GRIET), Hyderabad **2025-2029**
B.Tech, Computer Science and Engineering (AI & ML) | Currently in 2nd Year

Sri Chaitanya Junior College, Madhapur | Intermediate (TSBIE) **943/1000**

Sri Chaitanya School, Hanumakonda | Secondary School Certificate (SSC) **CGPA 10/10**

ACHIEVEMENTS & CERTIFICATIONS

- **Hackathons:** Winner, **CodeSprint** (GRIET); Winner, **Skysparks, Boeing National Aeromodelling Competition** (TECHKRITI, IIT Kanpur).
- **Startup Pitch:** Presented CaneCraft, a food-tech startup, at IIT Delhi Aarambh'26 with a 2 Crore funding ask.
- **Problem Solving:** 600+ problems solved (250+ CodeChef, 150+ HackerRank, 200+ Smart Interviews); HackerRank Gold Badge in C.
- **Certifications:** AI Fluency (Anthropic); Introduction to Modern AI (Cisco, Dec 2025); AWS Cloud Fundamentals; Python Essentials 1 (Cisco).
